A SPECTROMETER IS ALREADY IN THE POSSESSION OF THE CRIMINAL DEPARTMENT OF THE PROVINCIAL POLICE HEADQUARTERS IN BYDGOSZCZ

Within the project „Specialized training as an opportunity to increase effectiveness of law enforcement agencies in the fight against organised crime” has been purchased. A spectrometer is already in the possession of the Criminal Department of the Provincial Police Headquarters in Bydgoszcz.

Spectrometer is a device for hazardous and psychoactive substances` identification. The device uses two independent measurement methods which enables faster and more reliable identification of the tested substance. Fast identification of the tested substance will influence on more effective carrying our the operations on the most important scenes.

The equipment has been financed with Norwegian Financial Mechanism`s means and a state budget within the programme „Internal Affairs”. The programme is under supervision of Interior and Administration Ministry.

On 30th July 2021 in Provincial Police Headquarters in Bydgoszcz a course on the substance`s safe detection and identification using an electronic chemical detector (spectrometer) and a presentation of the practical applying of the detector in case of identification of the drug or implosive substance has been carried out as a workshops for device`s operators. Participants of the course has been 40 policemen of the Criminal Department and an Independent Contrterroristic Squad of the Police in Bydgoszcz. The course has been financed by means of the Norwegian Funds for the years 2014-2021 and state budget within the programme „Internal Affairs”.
